Subject: RE: Dynegy South Bay Concrete Sampling Plan

- 1. Cleanup Verification Sampling and Analysis Plan (Verification SAP).** The Verification SAP shall include, but is not limited to (1) methods used for sample extraction and analysis; (2) USEPA approved cleanup levels and actions, (3) figures depicting the locations of cleanup verification samples, and (4) the level of quality assurance reporting guidelines that will be used by Americas Styrenics contracted laboratory. Americas Styrenics must submit the Verification SAP for USEPA approval; however, the preparation and submittal of the Verification SAP should not prevent Americas Styrenics from beginning to implement the SICP and decontamination of Train 4.
- a. The laboratory analytical results shall include, but not be limited to (1) all analytical results for field and laboratory quality assurance samples, (2) a narrative explaining issues encountered during extraction and/or analysis of field and laboratory quality assurance samples and corrective actions taken, (3) acceptance limits for all quality assurance samples with surrogate sample analysis following a minimum acceptance criteria of 60 to 65%, (4) data quality flags are accurately shown in the report for qualified data, (5) tentatively identified compounds (TICs), (6) extraction and analytical methods used, (7) extract procedures used, and (8) the surrogates used. All laboratory analytical results shall be included in the final cleanup completion report and such reports shall be made available to the USEPA within **3 days** after receipt of such report by Americas Styrenics.
